

Ironbark Decking

QUALITY TIMBER PRODUCTS

Natural Hardwood Decking perfection - IRONBARK, one of the World's most naturally durable timbers.

Ironbark is an extremely durable and hard-wearing hardwood, making it perfect for any outdoor application where longevity and durability are a key requirement.

Adding to Ironbark's natural ruggedness, it has a stunning appearance with its interesting tight cathedral grain pattern and distinguishing tones from dark chocolate to deep red hues.

Ironbark's true wood has the highest natural resistance to rot and fungus and is classified as naturally termite resistant. This gives Ironbark decking a life expectancy greater than 40 years, the highest rating available for natural timber.

Ironbark's longevity and strength are second to none, with examples of centuries old construction that can still be seen today in bridges, wharfs and decks in some of the harshest environments across the globe.

Hurford's Ironbark decking is PEFC certified, which meets some of the strictest environment criteria in the world and is only harvested from sustainable managed forests.

Specifications:

Species:	Ironbark (Non Tropical Hardwood)
Profile:	Pencil Round, Smooth
Size:	140mm x 22mm
Dry Density:	1120kg/m ³
Hardness Rating:	Janka 14
