Treatment:	Sapwood treated to H3.2
Grade:	Standard & Better – Is generally of a clearer appearance as gum veins are rarely present. It has a fine, even texture and usually features an interlocked grain with some surface checking.

One of the simplest ways you can help protect our forests is to look for the PEFC label on products. When you see the PEFC label, it means that the forest-based material product comes from a PEFC-certified forest. This is a forest that is managed in line with the strictest environmental, social and economic requirements.

Hurford's decking is PEFC certified, which meets the strictest environment criteria in the world and is only harvested from legal sustainable managed forests.

Note: Timber is a natural product and variations of colour tones within a timber species is considered normal, hence photographs, samples and displays are only indicative of the colour range.
