FOURTEEN

SOLID HARDWOOD TIMBER FLOORING | BY HURFORDS

Brought together to share the diversity of Australian hardwood species, in one of Hurfords most loved flooring collections. A Solid Hardwood Floor is an investment for a lifetime. It not only adds value to your home but makes a high-end style statement all on its own.

Your Forever Floor

A forest that will be around
for generations to come.

One of the simplest ways you can help protect our forests is to look for the PEFC label on products. When you see the PEFC label, it means that the forest-based material product comes from a PEFC-certified forest. This is a forest that is managed in line with the strictest environmental, social and economic requirements.

BLUE GUM

Eucalyptus saligna

Sizes: 130 x 14mm & 180 x 14mm

A popular species for its beautiful colour, straight grains, strong and hard natural attributes. Making it sought after for both domestic and commercial flooring projects.

**THERMALLY
ENHANCED BLUE GUM**

Eucalyptus saligna

Sizes: 130 x 14mm & 180 x 14mm

A process using a unique temperature schedule through the drying process to create a colour palette that reflects a more scarlet intensity.

BRUSHBOX

Lophostemon confertus

Sizes: 130 x 14mm & 180 x 14mm

Brings warmth, displays appealing features and matches well with modern elegant spaces. Brush Box has an even texture with very tight interlocking grain.

TURPENTINE

Syncarpia glomulifera

Sizes: 130 x 14mm & 180 x 14mm

With beautiful deep chocolate reddish brown colouring, Turpentine is a floor that matches well with contemporary interior styling.

GREY IRONBARK

Eucalyptus paniculata

Sizes: 130 x 14mm & 180 x 14mm

Offering a large variety of colour from dark chocolate to nutty honey with some dark reddish brown. Recognised as an extremely hardwearing timber, perfect for high traffic areas.

**NEW ENGLAND
BLACKBUTT**

Eucalyptus andrewsii

Sizes: 130 x 14mm & 180 x 14mm

Straight grained timber with a warm nutty hue which will compliment a range of interior designs where a lighter neutral palette is required.

SILVERTOP

Eucalyptus laevopinea

Sizes: 130 x 14mm & 180 x 14mm

Being a contemporary neutral colour, Silvertop compliments well with a large variety of modern interior decors.

TALLOWWOOD

Eucalyptus microcorys

Sizes: 130 x 14mm & 180 x 14mm

Has long held a majestic presence, with its golden honey toning, its exceptional durability and its interesting grain features. Tallowwood offers an elegant neutral toned palette, with no compromise on density or durability.

ROASTED CAYENNE

Sizes: 128 x 14mm & 178 x 14mm

ROASTED PEAT

Sizes: 128 x 14mm & 178 x 14mm

Hurford Roasted is a process that has been developed to enhance timber flooring properties. It uses ultrahigh temperature and humidity to change the molecular structure of the hardwood and creates an extremely stable, more durable, denser product while darkening the natural colour. Heating wood to extreme temperatures permanently changes several of its chemical and physical properties. The change in properties is mainly caused by thermic degrading of hemicelluloses. The Hurford Roasting process is carried out in a purpose built Kiln in which the temperature is increased to 185–215 °C, depending on the processing level.

The colour of the wood fibre changes drastically as the ultrahigh temperature is introduced – the higher the temperature, the darker the change to colour of the fibre is. The colour change is permanent and penetrates the entire piece of hardwood, thus eliminating the need to stain flooring to achieve a rich dark coffee brown colour.

BLACKBUTT

Eucalyptus pilularis

Sizes: 130 x 14mm & 180 x 14mm

Renowned for both its strength and versatility of application. Blackbutt is a straight grain timber, complimenting interior decors with warm inviting neutral tones.

SPOTTED GUM

Corymbia Maculata

Sizes: 130 x 14mm & 180 x 14mm

A rich individual timber, desired for its striking backsawn grain structure, attractive fiddleback and vibrant colour palette.

ENVIRONMENTAL AWARENESS

*Hurford is committed to our forests,
our community and our future.*

Underpinning our commitment is an ambitious hardwood reforestation project in the local area where we have purchased over 5000 hectares of land and have commenced a planting program that will see more than 25000 new plantation eucalypt saplings established each year.

With careful management, Hurford aims to commence ongoing sustainable harvesting of these plantations within 25 years.

The plantations are established according to strict environmental guidelines and a code of practice that is regulated by the NSW government. These guidelines are designed to protect soil and water resources and support the surrounding habitat with special consideration to Australia's native flora and fauna.

Amenity plantings are included in every Hurford planting operation. Never to be harvested, these mixed species trees are established on creek banks for soil protection and to complement designated natural regeneration areas to provide additional corridors of native forest.

Hurford's source a proportion of timber from private native forest with the balance procured from State Forestry which is certified under the Australian Forestry Standards Chain of Custody. (AS4707 – 2006)

Hurford's insist that all timber produced from these forests is done so under the principles of Ecologically Sustainable Forest Management, a system developed to sustain the full range of commercial and conservation values of the natural forest diversity within ecological limits, for current and future generations.
